

ACCESSORIES

QUALITY COMPONENTS. BUILT TO PERFORM.

CT4

Low profile roof vent designed for efficient attic ventilation and a clean, modern look.

SCREWS

Premium quality roofing screws with built-in washer for secure fastening and long-lasting performance.

EMSEAL

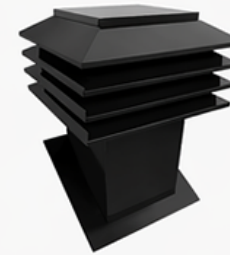

Expandable foam closure used to seal gaps and prevent water, air, and dust infiltration.

FOAM CLOSURES

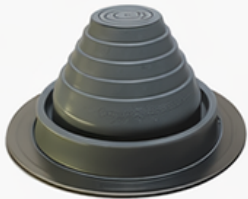

Ventilated foam closure for ridge applications that keeps out debris while allowing airflow.

MAXI VENT

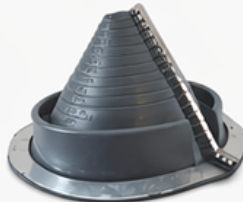

High-capacity roof vent for maximum airflow and attic ventilation.

PIPE BOOT

Flexible pipe flashing that creates a watertight seal around round penetrations.

ZIPPER BOOT

Adjustable pipe boot for irregular or hard-to-fit penetrations. Ensures a tight, reliable seal.

CAULKING

High-performance sealant designed for metal roofing and trim applications. Weather-resistant and durable.

HIGH TEMP SA SYNTHETIC UNDERLAYMENT

High-temperature synthetic underlayment provides a water-resistant barrier for added roof protection.

BUILT TO COMPLETE THE SYSTEM

Our range of accessories is carefully selected to complement our metal roofing and wall systems, ensuring professional results and long-term performance.

- ✓ High-quality products for reliable performance
- ✓ Designed to work seamlessly with our panels and trims
- ✓ Enhances weather protection and system longevity
- ✓ Essential components for a complete, professional installation
